

Mike Sieving – Columbus, Ohio

I was born in Columbus, but raised in a small town outside Akron. That's where I first started using tools. Some were used for good and some for evil. Working with my father I learned the basics of the hammer and saw (Good). By myself and with a screwdriver I learned about the insides of my Roy Rogers watch (Evil). When I reassembled it, I did have a part left over, but it still ran through a little fast. Since those early days, I've learned to use a lot of tools both big and small. Air powered tools while building pre-fab houses, down to microcircuit repairs kits when working on computers. I hope to pass on some of the basics of a few tools that can be used in many different ways and with a wide variety of materials.

Mike Sieving * Just Do It!

Friday #1D8 *
1 Day Workshop - 9am-4 or 4:30pm

Workshop Media – Tools workshop & Mixed Media
All Levels – class limited to 10 students

Pre class work – No
Kit Fee \$15.00

Why wait on someone else to find the time to help you build that perfect stand or accessory for your latest project. Why not be able to do it yourself? If have been intimidated by power tools this is a terrific workshop to squash those fears. Learn the basics of cutting, shaping, drilling, and sanding using Dremel rotary tools and scroll saws. Mike will coach you in the safe practice of using these tools by providing real hands-on practice. Learn how many different ways these tools can help you make your visions become real. You will walk away with confidence and a new found talent that

will be invaluable in making future platforms, settings, bases and props for your artwork. Bring your own rotary tool or share one that will be available in the classroom. Mike will also have scroll saws that can be shared. The message is clear. **Just do it!**

Student supply list: If you have a Dremel tool bring it if not you will be able to share a class Dremel.
